I am a 22-year-old student who decided to pursue Software Engineering as my higher education based on my interest in development and coding and some inspiration in the family. In my ongoing academic journey, I find myself even more attracted towards world of technology. Defining my capabilities, I find myself fascinating towards new challenges and could describe myself as a person who doesn't only believe in working hard, but smart as well. If given a chance, I am confident that I would contribute to the organization to my best ability and implement what I have learned so far as my academics.

Experience:

- MAX Hamburger (April 2023 – Present)
Part time job as a restaurant assistant to enhance my teamwork skills and handle myself in a pressure situation.

Skills

- Java
- Python
- Unit testing (in Python)
- C
- MS Word
- MS Excel
- SQL
- Agile Development (Scrum)
- HTML
- CSS
- JavaScript

- Node js
- Basic React knowledge. In my next term I will be learning MongoDB and in depth React framework

Moreover, I have been responsible for managing our academic projects which includes working with Jira and leading the presentations.

Tools

- MS VS CODE
- MS VS STUDIO
- MY SQL
- INTELIJ
- GitHub
- Jira

Languages

- English
- Urdu
